

FORBIUS

Forbius to Present at Two Upcoming Investor Conferences in November

- Jefferies 2018 London Healthcare Conference &
- Evercore ISI 2018 Healthcare Conference in Boston

(November 7, 2018) – Forbius, a clinical stage company developing biotherapeutics targeting EGFR and TGF- β pathways, announced that Ilia Tikhomirov, CEO of Forbius, will be presenting at two upcoming investor conferences in November.

The details for the presentations are as follows:

Event: Jefferies 2018 London Healthcare Conference

Date: Wednesday, November 14, 2018

Time: 5:20 p.m. GMT

Event: Evercore ISI Healthcare Conference

Date: Wednesday, November 28, 2018

Time: 2:20 p.m. EST

About Forbius: Targeting EGFR and TGF- β Pathways in Cancer and Fibrosis

Forbius is a clinical stage company that designs and develops biotherapeutics for the treatment of cancer and fibrotic diseases. We use our strength in biological understanding and diverse protein engineering technologies to design superior inhibitors of validated pathways. We have particularly deep expertise in targeting the transforming growth factor-beta (TGF- β) and epidermal growth factor receptor (EGFR) pathways. For both of these pathways, there is a significant body of evidence validating their role as drivers of multiple life-threatening conditions, including cancer and fibrosis. However, in the case of the EGFR pathway, the majority of patients do not benefit from currently marketed EGFR inhibitors; in the case of the TGF- β pathway, no agent targeting this pathway has yet been approved. By using multiple complementary platform technologies, Forbius' team overcame barriers that prevented the development of effective therapeutics targeting these pathways.
